

New ODM Sticker XXL Casing-in machine produces wallet-size up to tabloid hard cover books

ODM Sticker (Casing-in) machine is simple to operate, self-adjusting and requires no make-ready. The Sticker XXL has been re-engineered to produce hard cover books from wallet-size up to tabloid size covers. Cost-effective bookbinding machine can produce 100 to 400 covers per hour. Ideal for entry-level hard cover photo bookbinding production. ODM machines are built in the USA and work seamlessly with ODM's Casemaking System and Smasher XXL Series.

ODM Sticker XXL (minimum size: 4 x 4-inches x 1/32-inch; maximum: 18 x 18-inches x 4-inch) features an easy-to-use control panel, a roller glue station for rounded and backed books, a three-position blade height control and removable glue stations for fast and easy clean-up. Optional extra paste attachment (for additional adhesive in the joint area) is available.

The operation of the Sticker XXL consists of placing the book on the wing while the machine is in the home position. After the book is loaded, the operator depresses a foot switch that drops the wing below the glue rollers. A servomotor brings the two glue stations in contact with the book while the wing travels upward, applying a uniform coating of adhesive to the end papers. As the book emerges from the glue pots the operator places the cover in position with a handy cover guide and removes the book from the wing. It is CE approved.
